Project : Profile Management System

Languages Used:

1. Spring Boot
2. React
3. MysqlWorkBench

Working:

1. Open Mysql workbench and **create database profilemanagementsystem.**

2. Run The Backend Spring Boot In Vscode. Open And Run The Program **profilemanagementsystemApplication.java** After Successfully Running.

3. Open New Window in Vscode Open FrontEnd File And Open New Terminal Enter **cd Frontend** Press Enter.

4. After That Give npm command **npm install**

5. To Run FrontEnd Program **npm start**

6. The Project is Open In **localhost:3000**

Note:

Both Frontend And Backend run Simultaneously in vscode.
